SYSTEC Offers Complete Line of Legal Filing Products

Wales, Wis. - The SYSTEC Group introduces a complete line of specialty filing products for legal and financial applications including expansion pockets and envelopes, intellectual property folders, pressboard, classification and presentation folders. The specialty filing line is made possible through a partnership with International Filing Company for national distribution of their well-known Redweld® product line.

“This partnership brings two very well-respected names, Redweld® and SYSTEC, together to distribute a robust filing solution nationally. Functional and efficient file system design and record retention are essential for legal entities and departments to maintain control of vital information and increased regulatory compliance,” explains Denise Harris, executive director of The SYSTEC Group. “From legal and accounting records to patent and trademark applications, the legal filing product line offers efficient solutions to specialty filing challenges.”

Expansion pockets and wallets deliver reliability and quality through the use of durable gusset expansions built to retain shape and strength while maintaining pliability. Custom options for the expandable products include color, height, gusset style, paper stock and closure type. The versatility of these products enables the customer to use them for multiple file volumes and storage options while ensuring the long-term safety and security of enclosed documents.

-more-

Redweld® mailing envelopes incorporate Tyvek® to safeguard documents against punctures, tears and moisture damage while maintaining a light weight to reduce shipping costs. Envelopes can be printed with a company logo, name and address to further customize the product.

Intellectual property folders organize and protect sensitive documents. Individual company or project requirements are satisfied through several customizable options, including color-coded reinforcements, custom printing, interior pockets and the addition of Tyvek® gussets for increased capacity.

Pressboard and classification folders allow for long-term use while facilitating quick retrieval of information due to their easy sorting and segmentation options. Folders can be ordered with any number of dividers to suit different capacities and materials. Other customized selections include color, size, paper stock weight, pocket placement and type, fasteners and tabs. These folders are ideal for financial records and other sensitive applications. A consolidated binder is provided for multiple projects.

Presentation folders, professional and impressive custom portfolios, offer an innovative, versatile and unique way to present information. The 5-piece expansion portfolio, complete with custom printing, sizes and colors, creates a durable and portable filing solution ideal for the organization of vital information necessary to new employees or client presentations.

Retention pockets provide for added storage space in fastener folders or binders and create a safe space for documents, disks and other objects which cannot be hole punched. The expandable pockets maintain the integrity of documents and objects while allowing them to be stored with related materials.

-more-

All products are constructed from acid-free materials designed for maximum security, durability and flexibility. The various styles and colors of gussets are tear-resistant and have a superior shelf life. Rivets are standard on pockets and envelopes but can be added to any product for reinforcement at stress points. Custom fastener options include elastic cords, tie tape, buttons, strings or Velcro®. Style, location and dimension of tabs on pockets and folders are also constructed according to client specifications.

SYSTEC specializes in the design and delivery of fully integrated or individualized information and materials management solutions. From storage and space-saving products to information management and electronic document systems, SYSTEC professionals provide decades of experience, expert product knowledge and customer service, all from a single source.
