

ThinFile™ filing systems

Product highlights

- Designed for optimum filing to store the maximum capacity in the least amount of space.
- Choice of shelf and drawer options allows customization of interiors to meet varied storage requirements.
- Three heights, widths and depths to choose from to maximize available space.
- Available with locking door to address HIPAA security requirements.
- Top-mounted roll door secures stored items while minimizing footprint.

ThinFile™ provides everything you need for efficient filing of end-tab file folders and much more. Units are preassembled and ready for immediate use. ThinFile comes in preconfigured styles for a single storage format, or adjustable styles that mix and match interior options for a customized storage or filing solution.

Preconfigured units with shelves are offered for the most typical filing applications, letter and legal end-tab folders and x-ray files.

Adjustable units have shelves, drawers and accessories for end-tab folders, x-ray files, binders, top-tab file folders, hanging file systems, microfilm, disk and tape media storage.

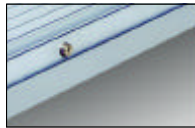

Units can be easily modified or field-retrofitted with completely different interior components and accessories to update the file as your needs change in the future.

Interior shelves are adjustable in 1/2" increments without tools or additional hardware. This provides much more flexibility to accommodate migrating file and media formats, and more potential vertical capacity than shelves that adjust only in 1" or 3" increments.

ThinFile filing systems

RollTec tambour door and locks

Hanging file frame

Traditional file drawer

File folder shelf

Catalog shelf

RollTec™ tambour door

The unique RollTec tambour door shields the contents from unauthorized access and can be completely opened for instant access to all shelves and drawers. The tambour door comes available with two lock choices - waist-high ergo lock or cam lock - to provide safety and security of stored items.

File drawers

ThinFile offers two choices for front-to-back or side-to-side filing of top-tab file folders – the traditional file drawer or the hanging file frame.

File folder shelf

The 11" deep file shelf is slotted on 2" centers. Rigid shelf dividers support heavy manila end-tab file folders for perfect vertical organization. Dividers are included (three per shelf on the 36" wide file, four per shelf on the 42" and 48" files).

Catalog shelf

The 13" deep catalog shelf is also slotted on 2" centers and is ideal for binders and large books. Rigid shelf dividers are included (three per shelf on 36" files, four per shelf on 42" and 48" files).

Reference shelf

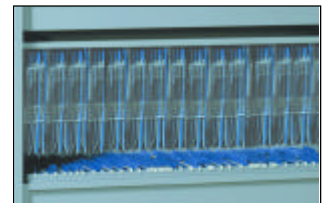

The optional 12 3/4" deep reference shelf is available on all adjustable shelf units and provides a convenient resource for referencing materials at the point of storage. for holding file folders while you pull or re-file. The reference shelf option is not available in "fixed shelf" files.

Reference shelf

Hanging pocket storage

Optional hanging pocket storage offers the convenience of side-tab viewing while allowing for storage of top-tab file folders or other stored items.

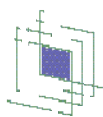

Hanging pocket storage

Media drawer

The 4" high media drawer holds an array of media types or other small items. It includes five front-to-back drawer dividers, adjustable in 1/4" increments.

Media drawer
