Your filing needs are unique and demand quality, long-lasting filing solutions.

From legal and accounting records to patent and trademark applications, SYSTEC's Specialty Filing Products by Redweld® include a wide assortment of standard and custom products to help you maintain control over your vital records.

SYSTEC offers a complete line of expansion pockets and wallets, envelopes, intellectual property folders, retention pockets, pressboard, classification and presentation folders. For unique, custom-tailored requirements, we can modify construction or imprint company names, logos or printed forms to provide you with professional, customized filing solutions to meet your individual business needs for years to come.

Specialty Filing Products

Expansion pockets and wallets are designed for legal and accounting applications and are ideal for handling multiple volume usage and ensuring content privacy.

Mailing envelopes offer a high-quality alternative and provide security and integrity for mailed file transfers.

Intellectual property folders, two- and three-leaf designs, keep patent/trademark documents organized and secure.

Indexes allow for easy referencing and increased efficiency.

SYSTEC offers a full line of Specialty Filing Products featuring unmatched Redweld® brand quality and reliability.

Expansion Pockets and Wallets

Redweld® custom expansion pockets and wallets deliver reliability, consistency and quality and are the popular choice for applications requiring large volume files. Customize your pockets and wallets by adding your corporate logo or choosing your paper stock, gusset style and color. Durable, highly-pliable gusset expansions, built to retain shape and strength, are made from Tyvek® in 3 1/2", 5 1/2" and come in a variety of heights and 26 standard and customized colors. Carefully constructed from acid-free materials, our pockets and wallets will preserve your most valuable, sensitive contents. Elastic or cloth tie closures are available on wallets to ensure the security of enclosed materials.

Mailing Envelopes

Ensure the integrity of your documents with superior Tyvek® durability. These high performance mailers resist punctures, tears and moisture better than any other envelope, while still offering the cost-effective benefits associated with other lightweight products.

Intellectual Property Folders

Made to organize and protect sensitive documents like patent and trademark applications, these versatile folders are available with several customizable options to meet your specific needs. Store correspondence and vital documents more effectively with interior pockets or leaves punched to accommodate fasteners. Design a folder with tabs, color-coded reinforcements, expansion capacity or custom imprint specialty forms, handling information or company logos. Create an expandable folder and increase capacity by incorporating Tyvek® gussets.

Exhibit Dividers (Coming Soon)

Ensure your litigation files stay organized with exhibit dividers. Choose from the three most common tab styles – All-State®, Avery®, and Blumberg® styles. Dividers are printed on 80# bright white stock. Mylar tabs provide added strength in addition to easy referencing and increased efficiency.

Pressboard and Classification Folders

When organization is critical, pressboard and classification folders provide an easy way to sort and segment information. Quick identification makes retrieving materials from folder sections fast and easy, eliminating the need for multiple folders for one job. Folders can be customized with any number of dividers to meet your capacity or organizational needs and are available in top- or end-tab in a variety of sizes, colors, stock weights and finishes. For files requiring expanded capacity, custom two-piece pressboard binders are available with fasteners. Add pockets or pocket dividers for certificates, photos or sensitive documents, or vinyl pockets to hold CD/DVDs, diskettes or small items.

Presentation Folders

Complete the package with premium, professional custom 5-piece expansion portfolios. Custom expanding portfolios offer an innovative, versatile and unique way to present any type of information. Ideal for client presentations, recruitment, new employee kits and summer associate programs, these impressive, durable portfolios can be used anywhere dependable, portable filing is needed.

Retention Pockets

Expanding retention pockets can easily be attached to the inside of a fastener folder or binder to create a reliable filing solution for storing documents that should not be hole punched. This innovative folder is ideal for disks, annual reports, evidence and project reports.

Smead Compatible Pressboard *(Coming Soon)*

Now you can have all the strength and durability of a typical pressboard folder without the added cost. Our new pressboard is 25 times more moisture resistant than standard pressboard products with a 50% higher fold resistance and 50% higher tear resistance. Tyvek® expansions provide not only added strength and durability, but also ensure that whatever you include in your folder will fit with ease. Available in nine colors.

Pressboard and classification folders, which are well-suited for financial and other demanding applications, are durably constructed for long-term use.

Presentation folders are ideal for small volume, specialty applications and provide superior organization of vital information.

Retention pockets provide physical integrity of document groupings and hold large documents without punching.

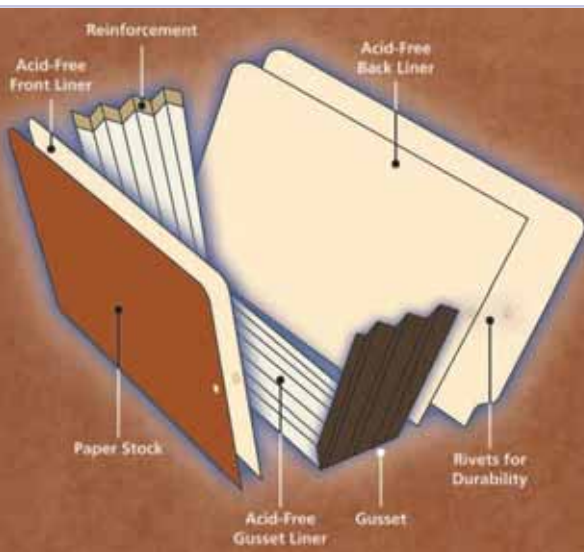

Pressboard pressboard adds moisture resistance, fold and tear resistance, without added cost.

REDWELD®

Specialty Filing Products

Made-to-order solutions meet every filing application.

MADE-TO-ORDER SOLUTIONS

Create a distinctive, professional look through customization with made-to-order filing products. Choose from gussets, rivets, printing, tab styles, dividers, subfolders or closures to create quick referencing for easy access to important information in an efficient and professional manner.

Construction

Custom expanding envelopes and pockets are constructed from five pieces: the gusset, front and back inside liners and the front and back are primary stock. This 5-piece construction guarantees a sturdy product with maximum durability, flexibility and resistance to soiling and marring. Custom expandables are available in letter, legal size or customize a size to fit your individual filing requirements.

Color gussets

Tyvek® gussets are tear-resistant and have a superior shelf life. Two types of gussets are offered: Tyvek® reinforced non-tear gussets and Duragusset Mylar® reinforced gussets.

Rivets

Rivets provide additional reinforcement and durability at the stress point where the gusset meets the folder. Rivets are standard on side tab pockets and envelopes. They may be added to any product at a minimal cost.

Closures

Select fastener styles based on individual filing needs. Elastic cord, tie tape, button, string or velcro closures are available on any custom design folder.

Tab styles

Custom filing products may be manufactured with a variety of custom tab styles. Common tab styles include full side tab, shelf tab, top side tab, metal tab, and back tab. Location can be right side, left side or front. The dimensions (left and right) can also be customized.

Printing

Custom expanding filing products can be imprinted to individual specifications. Important information is readily available by adding a company name, logo or printed form.
