Automating Package Exchange for Colleges

The growth in package volumes together with the challenge of student expectations for efficient and effective package delivery requires Colleges to think about new and innovative ways to manage logistics.

TZ Intelligent Locker Solutions offer a secure, simple, easy-to-use and automated package delivery and retrieval system. TZ solutions simplify the internal package delivery process, reduce parcel management operating costs while ensuring the highest levels of end-user convenience.

Helping colleges streamline and improve the process of parcel distribution and exchange.

- 24 x 7 secured and convenient solution for student.
- Reduce package holding time as student retrieves sooner.
- Streamline delivery process.
- New technology with ease of use for student.
- Modular and scalable solution.

- Offer both laminate and metal solution with custom finishes or paint.
- Customisable workflow to meet specific needs.
- Locker bank can run as standalone kiosk or networked with server application.
- High tech options – RFID, QR Codes etc.
